The Privilege of Discovery  

"Every so often, the veil of confusing experimental results is parted, and something deep and beautiful about how biological life works is revealed. It is as if a syllable that God spoke becomes suddenly audible. The thrill of unearthing such 'God speak' is one of the special rewards of my profession."

David T. Yue, 2006

Acknowledgements

The Yue family is profoundly grateful for the love, prayers, support, and endless food that has been sent their way during this difficult time from: our extended families, the Grace Fellowship Church community, wonderful friends including those who have come from afar, members of Boy Scout Troop 711, the Gilman community, the Advanced Radiology community, and the Johns Hopkins community. We would like to thank Advanced Radiology for their generous support towards the memorial luncheon.

Special thanks to Ginny and Erich Becker, and Takashi and Julie Yoshioka and Ivy Dick for pulling this memorial service together. Thank you to the incomparable Margaret Chang, MD (Nancy's sister) for running the logistics at our home for the extended family as well as being the organizer of the video and photographic memorial tributes of David in both digital and paper formats.

The boys have started a memorial website for David with donation information at:

Note from Nancy

David was doing what he loved up until the very end and now our Lord has taken him home. I still expect David to walk around the corner any minute and find comfort sitting in his office surrounded by his books and notes.

I have been so very very blessed to have this wonderful man in my life and treasure all the rich memories from our 30 plus years together. David craved truth in both science and faith and strove mightily on both fronts. He also loved mightily, pouring it into his family at home and his family at lab. After Christmas we opened our presents from David and his gift to Jonathan gave us our first real laughs in a long time. It was sad but wonderful at the same time. David lived loving God and people, and his life will continue to speak God's truth into people for years to come.
